What do all these companies have in common?

They ALL started in a garage!

Are you interested in doing more away from a screen, giving back to your neighborhood, or dreaming of being 'the next big thing'?

The 'maker movement' is an outlet for people like you happening all across the United States. Children and hobbyists, professionals and novices in all areas of the world are gathering together and working to find fun and creative solutions to everyday problems, build beautiful works of art, and engineer basic and complicated tools.

A documentary was filmed about the 'Makers' and the exciting opportunities the movement brings to communities all around us. Join us for a free screening of the movie.

Event is FREE but space is limited. Reserve your seat now!

March 19th, 2015
