Target Portfolio Strengths

Fixed - The significant news affecting interest rates this period was the Fed increasing its target Fed Funds rate by 25 bps in the second week of December, and despite continued tame inflation readings, the benchmark rate on the 10 year US Treasury Note also increased by about 10% in the quarter. In a turnaround from last period, and because of their corporate and mortgage bond overweights, William Blair exceeded their aggregate benchmark.

Equity - Resuming its place as the top performer, T Rowe Price Healthcare fund turned in another solid quarter. Also, since large cap growth was the best style and sector for the period, the Vanguard Growth fund had a very good period. Continuing their performance from last period, your REIT manager (Adelante) also turned in another solid quarter.

Weaknesses

Fixed - Generally, both US Treasuries and US Agency debt were the weakest in the period and thus the MVT bond portfolio was weaker, although it managed to beat its individual benchmark.

Equity - By sector and style, mid-cap growth and small cap core investments trailed their larger counterparts, and thus both the Baird Mid Cap Growth fund and Diamond Hill smid value funds under-performed.

Strategies

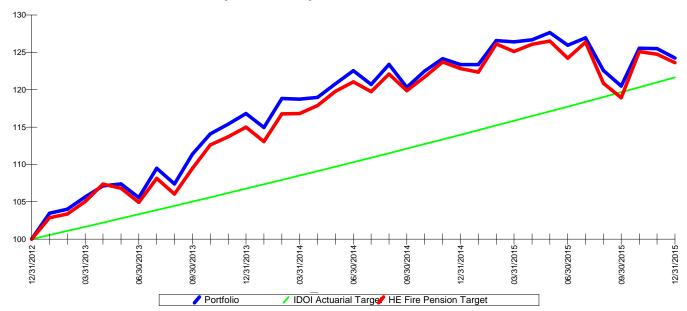

Despite the December Fed action, it remains evident that economic growth both internationally and domestically seems to be slowing. Moreover, recent Fed action will continue to strengthen the value of the US Dollar versus other global currencies, which will continue to keep inflation at bay, and adversely impact US exports. The current environment is consistent with what we've seen all year so our fixed strategy will be to continue staying close to benchmark duration on government debt in the MVT portfolio and look for yield and spread advantages from corporate issues in the Blair portfolio. In the equity asset class; market volatility and uncertain economic conditions have us continuing to favor dividend paying stocks and tactical investments in both REIT's and health care.

Hoffman Estates Firefighters Pension Definitions and Disclosures

Timing of Performance Information

It is quite common to have inaccurate information regarding index returns as well as pricing and transaction data from custodians at the end of a reporting period. Often, these inaccuracies are cleared up within the first week or two of the following period. Our pension clients should be aware that quarter-end data reported within the first two weeks of a new quarter has a higher likelihood of inaccuracy. We do our best to weed out these problems, but there may be times when we feel it necessary to leave out the performance for the final month of a quarter.

Index Returns

Index returns are reported directly from Morningstar.

Each portfolio is presented with an index or blend of indexes for performance comparison. Detailed similarities and differences between a style and a particular index are available upon request. No single index will precisely reflect a particular investment style; thus, the performance results of the indices chosen should be used for informational purposes only. In addition, the periods shown are for comparative purposes, and it should not be assumed that performance was identical in other periods not shown. These indices are unmanaged and do not include potential commissions, fees, or other transaction costs. You cannot invest directly in an index.

Per the investment policy, the benchmark for the total portfolio is 40% Barclays Intermediate Aggregate Index and 60% of an Equity Blended Index.

The equity blended index is 58.3% S&P 500, 33.3% MSCI EAFE, and 8.34% Wilshire REIT Index.

The benchmark for the William Blair and Company fixed income managed account was the Barclays Intermediate Aggregate Index from 01/31/2013 (inception) until 08/13/2014. Since then, the benchmark is the Barclays Aggregate Bond Index.

The benchmark for the Mitchell, Vaught & Taylor fixed income managed account is a blend of 90% Barclays Intermediate Government Index and 10% Barclays Corporate A+ 1-5 Year Index.
