Portfolio Strengths

Fixed - In this period, general interest rate levels remained in a pretty tight range, the UST 10 year started the quarter at 2.45% and finished at 2.40%. By sector, Corporate bonds and TIPS helped the most, with a slight advantage to the longer duration bonds versus the shorter, although both remained in positive territory for the quarter.

Equity - The stronger US dollar helped all of the international managers, but most especially, the developing markets fund. Also, returning back to form, the T Rowe Price Health Care fund had a very good quarter. Domestically, both large and mid cap growth managers added excess returns over the target.

Weaknesses

Fixed - As noted above, the entire yield curve moved in a very tight range, with the very nearest maturities under-performing by just a bit. Generally, government bonds under-performed the Corporate issues.

Equity - Higher overall bond yields continue to hurt REIT returns. In this recent high growth environment, the small and mid cap values names trailed their larger, more growth focused, counterparts.

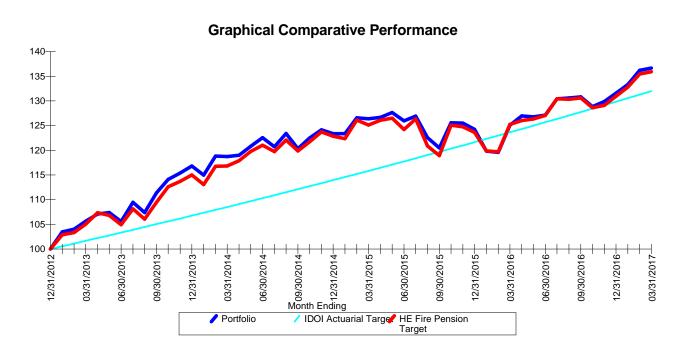

Strategies

Portfolio - After finishing last year strong, recent domestic economic data seems to be a continuation of that trend. Stronger durable goods, consumer confidence and labor numbers point to a steady upward trajectory. Internationally, a somewhat volatile political climate gives us a bit more cautious outlook, although a strong US\$ will aid those returns. The Federal Reserve expressed their confidence by again raising overnight rates by 25-50 bps, and continue to suggest another 2-3 hikes are coming this year. Furthermore, this most recent data has us continuing our longer term fixed income strategy of a slightly lower than target bond duration and an overweight to higher quality corporate names. In equities, a stronger US economy will have us favoring smaller cap and growth names and underweighting rate sensitive REIT's.

1Q2017	U.S. GDP expanded in the 4th quarter, growing at a 2.1% rate. Personal consumption and corporate profits contributed to growth. Net exports detracted. For all of 2016 GDP came in at a lackluster 1.6%.
	The Federal Reserve raised their Fed Funds rate target by one quarter percent in March citing a stronger economy and have indicated another two or three may occur in 2017.

4Q2016	The US election produced a somewhat unexpected outcome leading to some volatility in global markets. The Fed raised interest rates another 0.25% for the first time in 2016. GDP for the 3 rd quarter came in at 3.5% which was stronger than expected.

Timing of Performance Information

It is quite common to have inaccurate information regarding index returns as well as pricing and transaction data from custodians at the end of a reporting period. Often, these inaccuracies are cleared up within the first week or two of the following period. Our pension clients should be aware that quarter-end data reported within the first two weeks of a new quarter has a higher likelihood of inaccuracy. We do our best to weed out these problems, but there may be times when we feel it necessary to leave out the performance for the final month of a quarter.

Index Returns

Index returns are reported directly from Morningstar.

Each portfolio is presented with an index or blend of indexes for performance comparison. Detailed similarities and differences between a style and a particular index are available upon request. No single index will precisely reflect a particular investment style; thus, the performance results of the indices chosen should be used for informational purposes only. In addition, the periods shown are for comparative purposes, and it should not be assumed that performance was identical in other periods not shown. These indices are unmanaged and do not include potential commissions, fees, or other transaction costs. You cannot invest directly in an index.

Per the investment policy, the benchmark for the total portfolio is 40% Barclays Intermediate Aggregate Index and 60% of an Equity Blended Index.

The equity blended index is 58.3% S&P 500, 33.3% MSCI EAFE, and 8.34% Wilshire REIT Index. As of January 1, 2016 the equity blended index was changed to 58.3% Russell 3000, 33.3% MSCI All Country World Index xUSA, and 8.34% Wilshire REIT Index.

The benchmark for the William Blair and Company fixed income managed account was the Barclays Intermediate Aggregate Index from 01/31/2013 (inception) until 08/13/2014. Since then, the benchmark is the Barclays Aggregate Bond Index.

The benchmark for the Mitchell, Vaught & Taylor fixed income managed account is a blend of 90% Barclays Intermediate Government Index and 10% Barclays Corporate A+ 1-5 Year Index.
