Time for **work!**

Street Revitalization Project begins this spring

In a continued effort to keep our roads in great shape, the Village of Hoffman Estates is pleased to announce the **Street Revitalization Project**.

The goal of this program is to maintain Village roadways with as little inconvenience as possible. Your patience and understanding during the construction period are greatly appreciated.

This newsletter and the attached

information will assist you in learning more about the project.

The Village will oversee all construction implemented by the hired contractor for this project, who received the contract based on a competitive bidding process.

Street reconstruction involves full removal and replacement of the existing roadway and curb & gutter, along with partial replacement of sidewalks and driveway aprons.

Street resurfacing involves the removal and replacement of the wearing surface pavement, along with partial replacement of curb & gutter and sidewalks.

Project schedule

The entire project is scheduled to run from mid-March through November. A *tentative* schedule will be posted on our website once it becomes available. Depending on weather, contractor progress and other factors, these dates **will change** throughout the course of the project.

Most of the reconstruction or resurfacing work generally will be completed within a one-month time frame, excluding final landscape restoration. At some locations, additional underground infrastructure improvements will be included in the scope of the project, which can affect project timelines. More information is provided in the enclosed supplement.

ROAD
CONSTRUCTION
AHEAD

Project plans, tentative start dates, status updates, and any changes to anticipated schedules are posted weekly at hoffmanestates.org/construction. You can also find updates for other area road construction projects on our website. Scan the QR code to go directly to the website.

Driveway access and parking

Depending on whether your street will be reconstructed or resurfaced, driveway access will be limited at times. Please see the enclosed supplement for more information.

For your convenience, the Police Department will lift some parking restrictions adjacent to project locations and increase patrol activity. Parking will be allowed on both sides of adjacent streets, but it is still prohibited to park within 20 feet of a crosswalk, 15 feet of a fire hydrant, or against the flow of traffic.

Garbage pickup

Garbage pickup will occur on your regularly scheduled day; however, pickup times may vary based on construction activities scheduled on your street. To ensure pickup, please have the garbage set out by 6 a.m. on the regularly scheduled day.

Homeowner property in Village right-of-way

The Village right-of-way, which is generally defined as the area from the street to the sidewalk, is to be kept free of homeowner property.

Items such as **sprinkler systems, electric dog fences, brick pavers, coach lights, custom mailboxes, flower boxes, special landscape features, etc.**, may interfere with proposed work.

VILLAGE OF HOFFMAN ESTATES

STREET REVITALIZATION PROJECT THIS STREET WILL BE RECONSTRUCTED

DATE

FOR ADDITIONAL INFORMATION, PLEASE CALL 847-252-5800
"COMMITTED TO CONTINUALLY IMPROVING THE QUALITY OF LIFE"

The Village is **NOT** responsible for such property within the right-of-way or parkway. If you have any of these items located in the Village right-of-way, please contact the Engineering Division prior to the start of work on your street.

Mail delivery

Mail delivery will continue during the street project. On some streets, mailboxes next to the curb will be removed during construction. Cluster mailboxes will be set up at the end of the block for mail delivery in these situations. On most streets, mail delivery will occur as normal.

Parkway landscape restoration

Restoration of the disturbed parkways will occur after completion of the street work. Sod will be used on streets that have been reconstructed. Seed and erosion control blankets will be used on streets being resurfaced.

All areas will be backfilled with topsoil for safety shortly after the completion of roadway work. Due to high summer temperatures, **most** final landscape restoration work will not begin until mid-September.

At the completion of the project, Village engineers will assemble a list of items that were not satisfactorily completed by the contractor, which will include improper restoration. Please be assured that, if there are deficiencies, Village engineers will be working with the contractor to correct them.

Additional project-related questions?

Do not hesitate to contact the Engineering Division if you have additional questions related to police, fire and ambulance access, school bus access, handicap accessibility, special events, garage sales, block parties, moving or remodeling, etc.

To sign up for weekly project related updates, send an email to construction@vohe.org. You may also sign up by calling the Engineering Division at 847-252-5800. We strongly encourage all residents to sign up for weekly email updates, as the project schedule will change throughout the course of the project.
